Professional Summary

I am an AI-driven UX/UI Designer with 12+ years of experience creating intuitive, accessible, and business-focused digital experiences. By combining design thinking with modern AI tools such as Figma, ChatGPT, Claude, Google Stitch, and Adobe Creative Cloud, I streamline user research, ideation, wireframing, prototyping, design systems, and content creation to deliver high-quality, scalable products faster and more effectively. Passionate about innovation and continuous learning, I leverage AI-assisted workflows to enhance productivity, improve user experiences, and drive business success.

Core Skills

UX Strategy | Product Design | User Experience Design | User Research | Design Thinking | Information Architecture | Generative AI Workflows | User Journey Mapping | Wireframing | Prototyping | Design Systems | Interaction Design | Responsive Design | Accessibility (WCAG) | Usability Testing | AI-Assisted Design | Developer Handoff

Tools

Design: Figma, Adobe Photoshop, Adobe Illustrator

AI: ChatGPT, Claude, Gemini, Figma Make, Google Stitch, Adobe Firefly

Professional Experience

Sr. UI/UX Designer | PamTen Software Solutions | Sep 2018 – Present

- Led the UX/UI design and delivery of 20+ enterprise web applications, SaaS platforms, dashboards, and mobile applications, driving user-centered solutions from discovery to production.
- Conducted end-to-end UX processes, including stakeholder workshops, user research, information architecture, user journeys, wireframing, interactive prototyping, visual design, and developer handoff using Adobe Creative, Figma.
- Designed 250+ wireframes, user flows, high-fidelity screens, reusable components, and interactive prototypes, improving design quality and accelerating product development.
- Built and maintained scalable design systems and component libraries, increasing design consistency, improving collaboration, and reducing design-to-development effort by 30%.
- Collaborated with cross-functional teams, including Product Managers, Business Analysts, Developers, QA Engineers, and stakeholders, within Agile/Scrum environments to deliver high-impact digital products.

- Integrated AI-assisted design workflows using Figma AI, ChatGPT, Claude, Google Stitch, and Adobe Creative Cloud to accelerate UX research, ideation, UX writing, documentation, and design iterations, reducing design turnaround time by 40%.
- Mentored junior designers, conducted design reviews, established UX best practices, and ensured accessibility, usability, and responsive design standards across multiple products.
- Successfully delivered 20+ client engagements across healthcare, staffing, education, nonprofit, and enterprise domains, consistently meeting business objectives, user needs, and project timelines.
